

## How to Create Growers in Land.db (databases)

1. As a reseller, make sure that you have your Land.db / ECI user created
2. Contact Ag Connections Support by email ([support@agconnections.com](mailto:support@agconnections.com)) or phone (270-435-4369 Option 1) with the following information.
  - Name of the database that needs to be created
  - The names and emails of the users that need to be added to the database. This is a good time to add your Enogen Account Lead to the database if you wish for them to help you.

## Example email asking to have databases created

To: [support@agconnections.com](mailto:support@agconnections.com)

Subject: Enogen Database Creation

**Copy and paste the following text:**

Support,

I need to have the following databases created for Enogen contracting.

Databases:

Users:
